WELCOME TO LEIPZIG

Michael A. Borger

Michael J. Mack

Dear Colleagues,

It is our pleasure to invite you to the upcoming EACTS Course in Cardiovascular Innovation. It is the 10th time that the International Leipzig-Dallas Meeting will be held here in Leipzig, Germany. The programme includes several live operations and interventional cardiology procedures, as well as dedicated lectures with extensive face-to-face expert discussion. We are convinced that the meeting will be both educational and engaging for those with a special interest in being at the forefront of structural heart disease management.

The focus of our meeting will be Innovation in Cardiovascular Medicine. A mixture of lectures and live procedures have been planned in order to optimise the learning experience of attending cardiac surgeons, cardiologists, trainees, and industry members. With the participation of recognised key opinion leaders from around the world, we will be able to provide a unique educational experience that you are sure to enjoy. In addition, the social programme promises to be as lively and engaging as the scientific one.

It will be our privilege to welcome you to Leipzig on December 11 and 12, 2017. Come enjoy the learning experience, the social interaction, and the renowned Christmas atmosphere of our dynamic city!

Yours sincerely,

Michael A. Borger, MD PhD
Heart Center Leipzig, Leipzig, Germany

Michael J. Mack
Medical City Dallas Hospital, Dallas, Texas, USA

PROGRAMME OVERVIEW

SESSION TOPICS:

- Atrioventricular Valve Disease: Focus Mitral I
- Atrioventricular valve Disease: Focus Tricuspid II
- Ischemic Heart Disease
- Atrial Fibrillation
- Aortic Disease
- Aortic Valve Disease

LIVE CASES: (please note that these may be subject to change)

- Complex minimal invasive mitral valve repair and preop planning
- Beating-heart transapical chord implantation
- Novel transcatheter mitral valve replacement device (animal case)
- Tricuspid valve clipping
- Redo-tricuspid valve surgery sternotomy
