Quality Improvement Programme

User Sign-up Guide

Version 1.0

30th July 2025

ACD Overview and Objectives

The European Association for Cardio-Thoracic Surgery (EACTS) Adult Cardiac Database (ACD) is a collaborative registry and benchmarking tool of cardiac surgical data for centres on an international scale, giving surgical teams the advanced data tools and insights to continually improve outcomes for patients.

The ACD aims to:

- Bring participating hospitals, national registries and surgeons together to advance the field of cardiothoracic surgery through comparative data analysis and sharing of best practice.
- Support surgical training and education and informing evidence-based practices for current and future cardiothoracic surgeons.
- Provide a controlled access mechanism for researchers to request access to the data, regulated by a scientific committee and in line with established governance frameworks.

User Sign Up

ACD Registration form

Users that are **EACTS Members** or from an **Individual Centre or National Registry that contributes data** (Institutions) to the ACD are eligible to sign-up for the ACD and gain access to the ACD Web Platform.

ACD data onboarding for Institutions is officially completed through the [ACD registration form](#) which must be signed by the chief surgeon of an individual centre or a representative from a national society or registry. If you are interested in enrolling, please get in touch by emailing quip@eacts.co.uk

For EACTS Members

EACTS members should sign-up for the ACD using the email address that is entered in the [EACTS membership system](#). This is typically the email EACTS will contact members on.

For Institutional users

Users who work at **Individual Centres** that have contributed data to the ACD, should sign up using their individual centre email address set-up by the centre's Chief Surgeon.

ACD Founding Charter

The [ACD Founding Charter](#) establishes the governance framework for the ACD, outlining the terms of the agreement between EACTS and participants hospitals. It outlines the database's purpose of collecting anonymised cardiothoracic surgical data for quality improvement, benchmarking, and scientific research. It also includes information about General data Protection Regulation (GDPR) compliance.

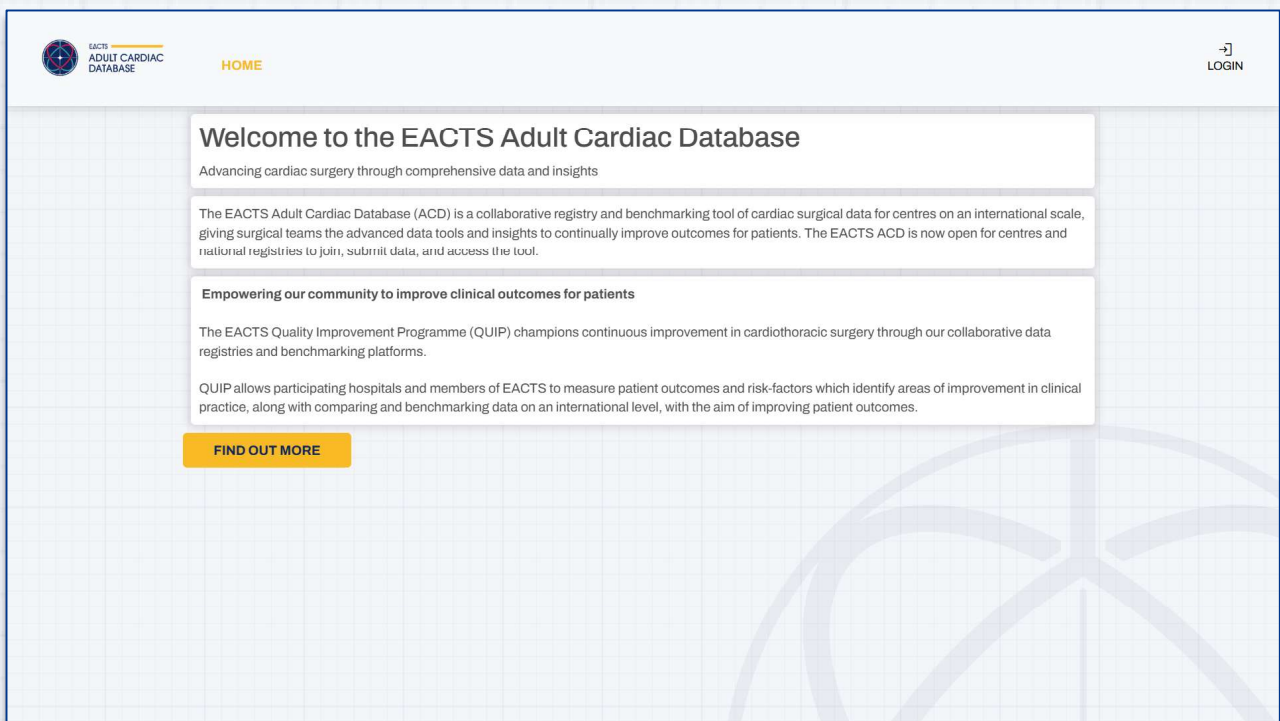

Authentication

Users need to have downloaded and set-up the Microsoft authenticator application for the Sign-up process to be successful.

To access the ACD web platform please visit:

<https://acd.eacts.org/>

First time users will be taken to the ACD **HOME** page:

EACTS ADULT CARDIAC DATABASE **HOME** **LOGIN**

Welcome to the EACTS Adult Cardiac Database

Advancing cardiac surgery through comprehensive data and insights

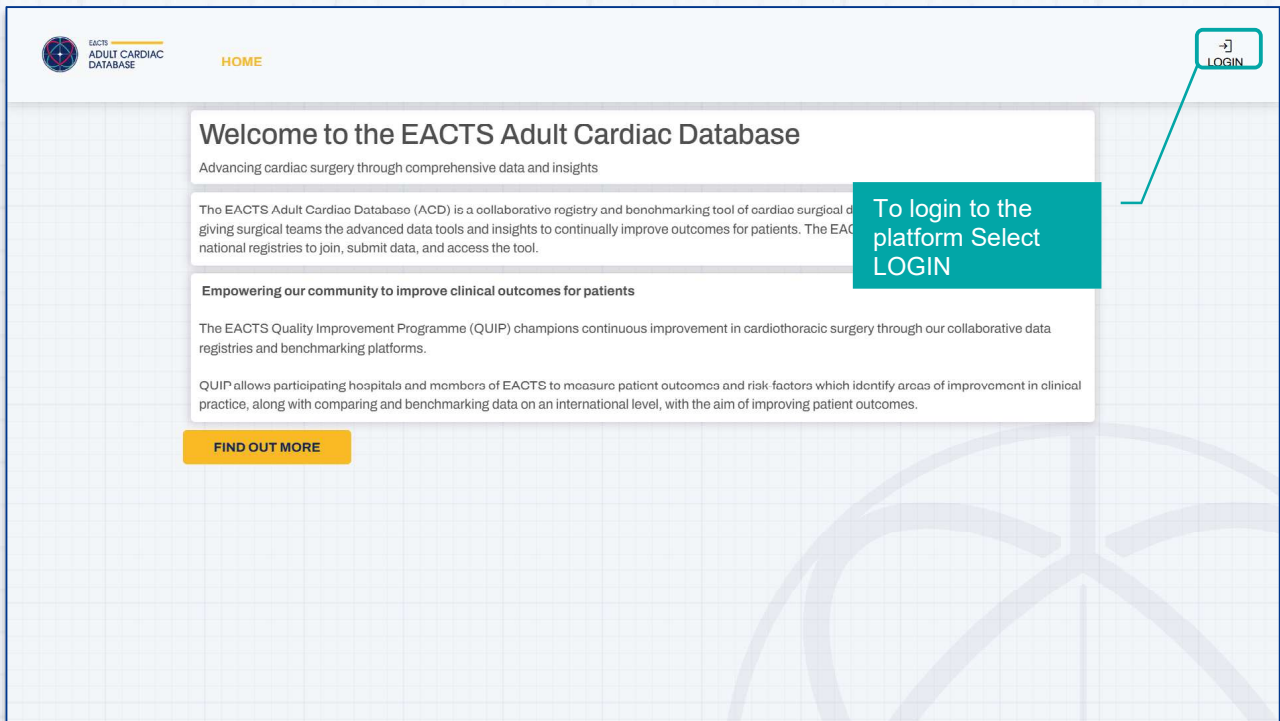

The EACTS Adult Cardiac Database (ACD) is a collaborative registry and benchmarking tool of cardiac surgical data for centres on an international scale, giving surgical teams the advanced data tools and insights to continually improve outcomes for patients. The EACTS ACD is now open for centres and national registries to join, submit data, and access the tool.

Empowering our community to improve clinical outcomes for patients

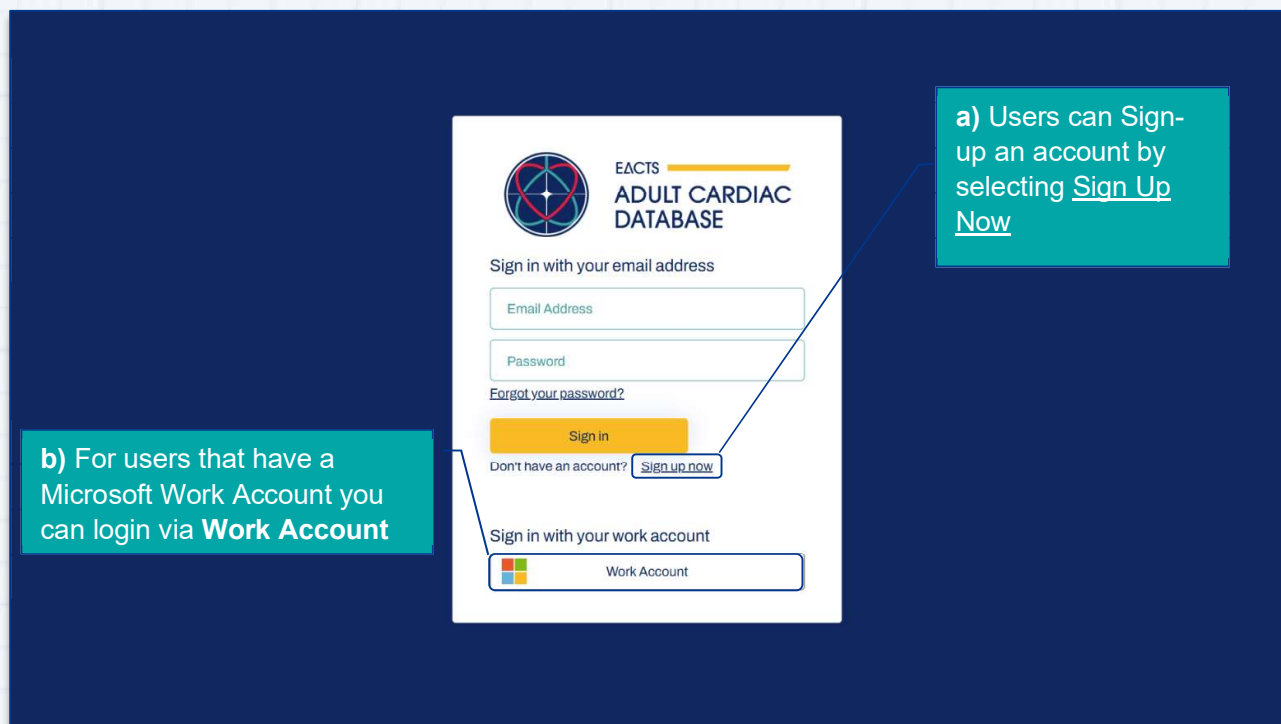

The EACTS Quality Improvement Programme (QUIP) champions continuous improvement in cardiothoracic surgery through our collaborative data registries and benchmarking platforms.

QUIP allows participating hospitals and members of EACTS to measure patient outcomes and risk-factors which identify areas of improvement in clinical practice, along with comparing and benchmarking data on an international level, with the aim of improving patient outcomes.

FIND OUT MORE

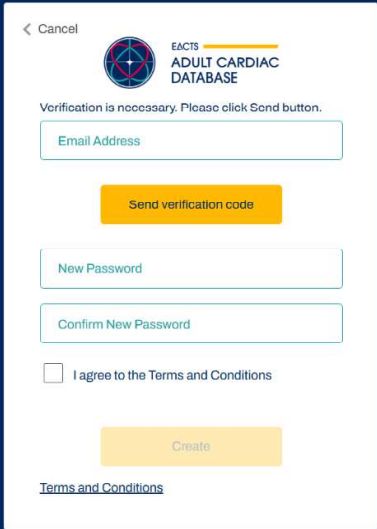

Users can sign-up for an account via two methods:

Signing up using Sign up Now (a)

Selecting Option (a) above, will take you to the **Sign Up** page below:

< Cancel

The EACTS ACD is now open for centres and national registries to join, submit data, and access the tool.

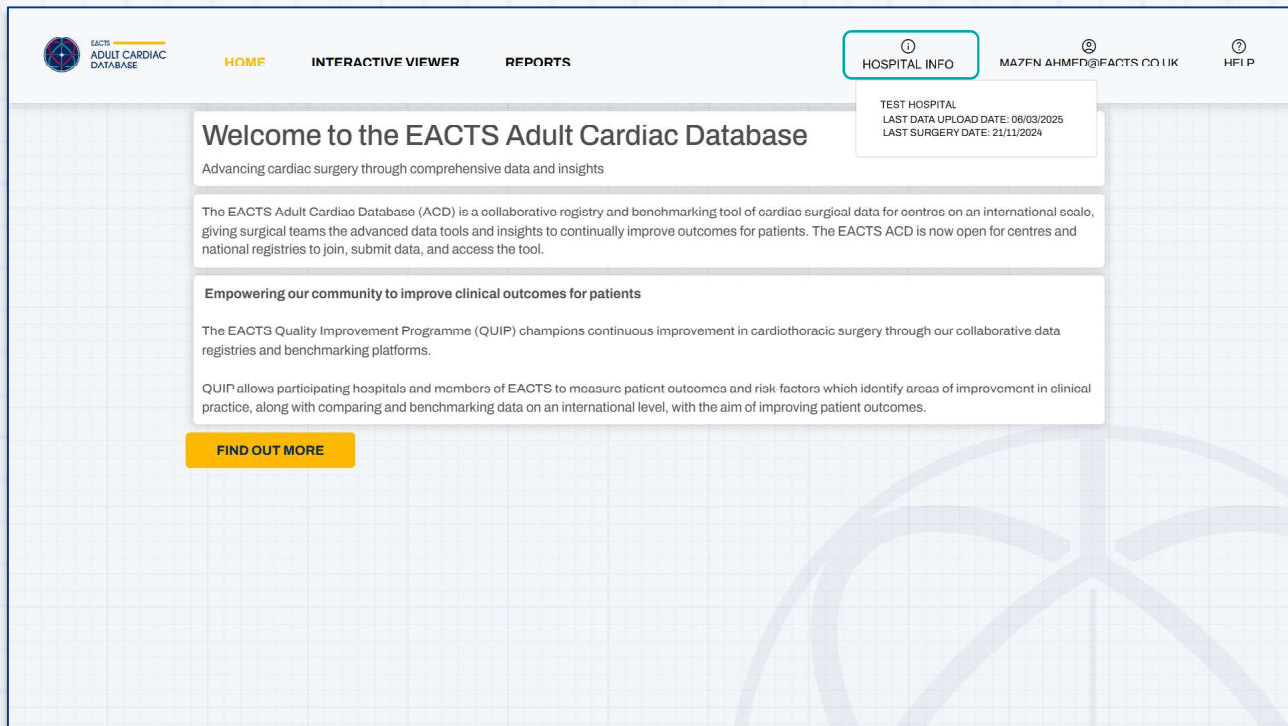

Empowering our community to improve clinical outcomes for patients

The EACTS Quality Improvement Programme (QUIP) champions continuous improvement in cardiothoracic surgery through our collaborative data registries and benchmarking platforms.

QUIP allows participating hospitals and members of EACTS to measure patient outcomes and risk factors which identify areas of improvement in clinical practice, along with comparing and benchmarking data on an international level, with the aim of improving patient outcomes.

[FIND OUT MORE](#)

Users that belong to a participating hospital should see HOSPITAL INFO:

The screenshot displays the EACTS Adult Cardiac Database (ACD) user interface. The top navigation bar includes the EACTS logo, 'HOME', 'INTERACTIVE VIEWER', and 'REPORTS'. A 'HOSPITAL INFO' button is highlighted with a circled '1'. To its right, the user's name 'MA7FN AHMED@FACTS.CO.UK' and a circled '2' are visible. Below the navigation bar, the main content area features a 'Welcome to the EACTS Adult Cardiac Database' section with the tagline 'Advancing cardiac surgery through comprehensive data and insights'. This is followed by two paragraphs of text describing the ACD as a collaborative registry and benchmarking tool, and the EACTS Quality Improvement Programme (QUIP) as a continuous improvement initiative. A 'FIND OUT MORE' button is located at the bottom of this section. On the right side, a 'TEST HOSPITAL' box displays the following information: 'TEST HOSPITAL', 'LAST DATA UPLOAD DATE: 06/03/2025', and 'LAST SURGERY DATE: 21/11/2024'. A circled '3' is placed above this box. The background of the interface features a faint, stylized graphic of a heart or a surgical instrument.

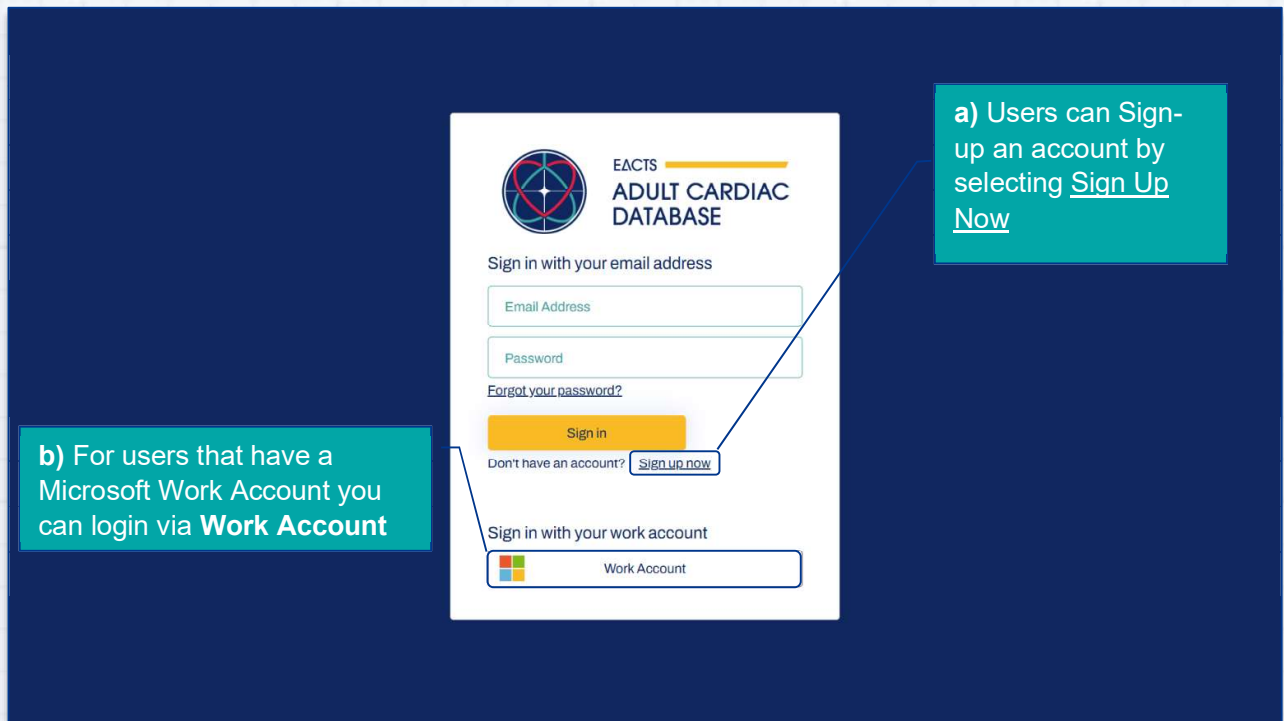

Selecting this will display:

- Your hospital name
- Last data upload date for your hospital
- Last surgery date for your hospital

If you find that this information is not correct, please log a support request [here](#)

Logging in using you Microsoft Work account (b)

If you have a Microsoft Work account and your IT administration can set-up the appropriate access, you can take option (b) below to access the ACD

The screenshot shows the EACTS Adult Cardiac Database login interface. It features a header with the EACTS logo and the text 'EACTS ADULT CARDIAC DATABASE'. Below this, there are two main login sections. The first section, 'Sign in with your email address', includes input fields for 'Email Address' and 'Password', a 'Forgot your password?' link, a yellow 'Sign in' button, and a 'Don't have an account?' link with a 'Sign up now' button. The second section, 'Sign in with your work account', includes a 'Work Account' button with a Microsoft logo. Two callout boxes are present: one on the left pointing to the 'Sign up now' button, and one on the right pointing to the 'Sign up now' button.

a) Users can Sign-up an account by selecting Sign Up Now

b) For users that have a Microsoft Work Account you can login via **Work Account**

Users signing in via their **Work Account** for the first time may receive the following message:

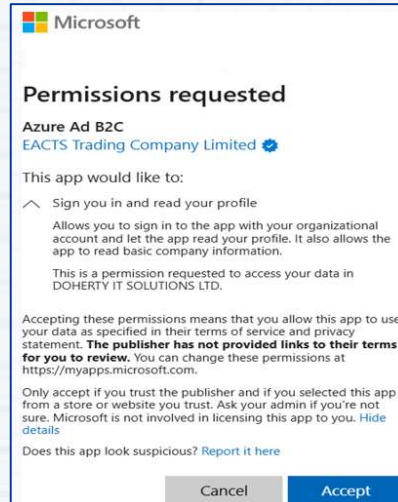

Your hospital's **IT administrator** will need to provide you access to the platform.

Granting User Access using a Microsoft work account

The following section is applicable to **Hospital IT administrators** authorised to register applications themselves.

1. Login to <https://acd.eacts.org/> using an administrator account and accept the requested permission:

2. The Administrator should then approve the Enterprise Application for all other users within their tenant:
 - a. Navigate to the Azure Portal, Entra ID and finally [Enterprise Applications](#)
 - b. Search for “Azure AD B2C” and select the entry with an Application ID of:
 - i. c7c52815-5b0c-4597-986a-7c7f6db2cb24

Name	↑↓	Object ID	Application ID
AA Azure Ad B2C		79df7ce4-1562-4c15...	c7c52815-5b0c-4597...

c. Navigate to Permissions

Grant admin consent for

Admin consent User consent

API name	Claim value	Permission	Type	Grante...	Grante...
No admin consented permissions found for the application					

d. Select Grant admin consent for the Microsoft 365 tenant name to allow access for all future users.

Appendix 3 of the [ACD Founding Charter](#) outlines the ACD's technical and security specifications
